

BlueSaverSM Prescription Savings Program

Savings average 21%, with the potential of up to 50%, based on national program savings data*.

All BlueOptions, BlueCare (HMO), and BlueChoice (PPO) members are now able to take advantage of the new BlueSaver prescription savings program. Members and their covered dependents are eligible to receive special discounted pricing at select participating pharmacies. The BlueSaver prescription savings card is available to members at no cost and does not replace their existing pharmacy drug coverage. The card can be used for both brand name and generic drugs not covered under the member's pharmacy benefit plan (i.e. smoking cessation, weight management, lifestyle, contraceptives etc.). Savings are automatic, with no claim forms to fill out.

- ✓ To obtain a BlueSaver prescription savings card, members are required to self-enroll by registering online at www.bluesaverflorida.com.
- ✓ When registering, members will provide a group number. Members with a pharmacy plan that only provides coverage for generic drugs (i.e. \$15 Generic Only) should use group number 798. All other members should use group number 799.
- ✓ Once enrolled, members will receive a fulfillment package, which contains program information, a list of participating pharmacies and a BCBSF branded BlueSaver ID card. Members who enroll online have the option to print a temporary id card and can search for participating pharmacies.
